PROFESSIONAL SUMMARY

Strategic Technical Product Manager with 11+ years of experience leading enterprise platform products, cloud modernization, developer experience, and AI-driven innovations. Proven ability to define product vision, influence stakeholders, and deliver measurable outcomes through customer-focused and data-driven product leadership.

ACADEMICS

- Post Graduation (PGP) in Strategic Product Management, **Indian Institute of Management (IIM) Visakhapatnam**, 2025
- **Master of Technology (M.Tech)** Computer Science, College of Engineering Trivandrum, Kerala University, 2015 | CGPA: 8.4/10
- GATE 2013 | Score: 538 | All India Rank (AIR): 2138
- **Bachelor of Technology (B.Tech)**, Computer Science & Engineering, Government Engineering College Thrissur, University of Calicut, 2012 | 64%
- Kerala Engineering Entrance Examination (KEAM) 2008 | Rank: 1355

SKILLSET

- **Product Management:** Product Strategy, Roadmapping, API Management, Platform Modernization, Developer Experience (DX), Product Analytics, Customer Discovery, AI Solutions
- **Technical:** API Platforms, Cloud Migration, Security & Governance, MVP Development & Technical Prototyping
- **Tools:** Kibana, ServiceNow, Jira, Azure DevOps, Figma, Microsoft Office.
- **Leadership:** Stakeholder Management, Cross-Functional Leadership, Executive Communication.

PROFESSIONAL EXPERIENCE

UnitedHealth Group, Bengaluru

Products | Enterprise API Platform (Stargate) & Insomnia Enterprise

TECHNICAL PRODUCT MANAGER

April 2024 – Present

- Managed product strategy, adoption, and governance across enterprise API Platform and Insomnia Enterprise solutions supporting **40K+ users and 52K+ APIs**.
- Owned product strategy and roadmap for enterprise API Platform capabilities, driving modernization, self-service enablement, and platform governance.
- Led cloud modernization initiatives, including Tier-2 service migration and control plane migration to cloud-native infrastructure.
- Delivered self-service capabilities such as Consumer Lookup, Proxy Lookup, API Tryout, and Resource Group Migration, significantly reducing manual effort.
- Spearheaded security initiatives including OHID credential cleanup, IDP secret rotation, proxy ownership validation, and HTTP-to-HTTPS remediation.
- Partnered with engineering, operations, and security teams to prioritize platform investments and define scalable API management solutions.
- Leveraged ServiceNow insights, operational telemetry, and customer feedback to identify product opportunities and drive roadmap decisions.
- Introduced observability enhancements and OAuth troubleshooting improvements, accelerating issue resolution and improving platform reliability.
- Drove enterprise adoption through platform communications, documentation, and user enablement programs supporting **40,000+ users**.
- Reduced migration effort by **70-76%** through self-service automation.
- Enabled self-service support for **52K+ APIs**.
- Eliminated **~22 minutes** of manual validation effort per request.
- Rotated **1,309 IDP secrets** and remediated **668 HTTP proxies** to strengthen security and compliance.
- Expanded platform communication reach to **40K+ users** and **12,400+ managed users**.
- Led enterprise adoption of **Insomnia Enterprise** as the approved API testing platform, driving migration from legacy API testing tools across the organization.
- Defined onboarding, support, and enablement strategies, including Office Hours, migration guidance, troubleshooting forums, and best-practice documentation.
- Owned release lifecycle management, coordinating testing, approvals, communications, rollout planning, and version upgrade initiatives.
- Partnered with Kong engineering and internal stakeholders to investigate product issues, influence feature enhancements, and improve customer experience.
- Drove user adoption and operational readiness across authentication, SSO onboarding, certificate management, environment configuration, and collection synchronization workflows.

- Supported and enabled **12,400+ enterprise users**, establishing Insomnia as the enterprise-standard API testing solution.

UnitedHealth Group, Bengaluru

Product | Enterprise API Platform

CONSULTANT BUSINESS SYSTEMS

May 2022 – April 2024

- Conducted market research, competitive analysis, and customer discovery to identify opportunities for API Catalog and API Management products.
- Defined and prioritized product features and enhancements aligned with business objectives, customer needs, and technical feasibility.
- Contributed to product roadmap planning by incorporating user feedback, market insights, and platform adoption trends.
- Developed business cases, cost-benefit analyses (CBA), product forecasts, and Total Addressable Market (TAM) assessments to support product investment decisions.
- Partnered with engineering, design, and business stakeholders to define product requirements, user stories, and acceptance criteria.
- Gathered customer feedback through surveys, interviews, and support case analysis to drive product improvements and enhance user experience.
- Established and tracked key product KPIs, enabling data-driven decision making and continuous product optimization.
- Collaborated with engineering teams to prioritize and resolve product defects, usability issues, and customer-reported concerns.
- Led product communication initiatives, including feature announcements, documentation, and user enablement materials.
- Analysed ServiceNow incident trends to identify documentation gaps and opportunities to improve customer self-service adoption.
- Developed Kibana dashboards to measure user engagement, product adoption, and usage trends, contributing to a **40% increase in platform traffic and visibility**.

HCL Technologies, Bengaluru

Product | SpaceLogic C-Bus Commission

PRODUCT OWNER

May 2020 – May 2022

- Conducted market research and competitive analysis to identify product enhancement opportunities and influence roadmap decisions.
- Partnered with customers and stakeholders to define and prioritize product requirements aligned with business objectives and market needs.

- Authored user stories and acceptance criteria, ensuring clear requirements and efficient Agile delivery.
- Served as the voice of the customer, translating user feedback into actionable product improvements.
- Collaborated with engineering teams to drive product vision, prioritize backlogs, and deliver features on schedule.
- Developed product communications, release materials, and user documentation for SpaceLogic C-Bus Commission Software.
- Defined and tracked key product metrics (KPIs) to evaluate product performance and adoption.
- Leveraged customer feedback and usage insights to make data-driven product decisions.
- Recommended UI enhancements that contributed to a **40% increase in customer adoption**.
- Established a structured customer feedback program, resulting in a **10% improvement in customer satisfaction**.

Infinite Computer Solutions, Bengaluru

Product | Conduent HSP

ASSOCIATE PRODUCT OWNER

Sep 2019 – April 2020

- Analysed product performance, user behavior, and customer feedback to identify opportunities for feature enhancements and user experience improvements.
- Partnered with Product Managers and engineering teams to define feature objectives, success metrics, and tracking mechanisms, enabling data-driven product decisions.
- Developed product documentation, release communications, and user enablement materials, contributing to a **15% increase in user engagement**.
- Conducted customer interviews and market analysis to identify pain points and inform product roadmap prioritization, resulting in a **15% improvement in customer satisfaction**.
- Established a structured customer feedback program, driving continuous product enhancements and increasing **NPS by 12 points**.
- Defined and monitored key product KPIs and dashboards, leveraging insights to improve feature adoption and utilization by **18%**.

Alten Calsoft Labs, Bengaluru

Product | Airbus Aviation Platform

PRODUCT ANALYST

Apr 2019 – Sep 2019

- Analysed product performance, user behavior, and customer feedback data to identify trends, uncover opportunities, and drive product improvements.
- Performed root cause analysis on product issues and user experience challenges, providing actionable recommendations to improve functionality and reliability.

- Defined, tracked, and reported on key product KPIs to measure product health, adoption, and alignment with business objectives.
- Developed dashboards, reports, and data visualizations to provide stakeholders with actionable insights into product performance and customer behavior.
- Facilitated data-driven reviews with business and product stakeholders to prioritize features based on safety, compliance, and customer value.
- Collaborated with aviation domain experts and cross-functional teams to gather, analyze, and document business and product requirements.
- Supported product launch and adoption initiatives through customer-facing communications, marketing materials, and stakeholder enablement activities.

SPI Technologies India Private Limited, Chennai

Product | Chegg web portal

SENIOR SUBJECT MATTER EXPERT

Nov 2015 – April 2019

- Collaborated with cross-functional teams—including marketing, UX, business operations, and engineering—to conceptualize and execute product experiments, leading to data-driven insights that informed strategic product decisions.
- Identified friction points in user journey and recommended optimizations that reduced churn by 7%.
- Partnered with customer support and marketing teams to translate user feedback into actionable product improvements.
- Supported go-to-market strategies by analysing market trends, competitor offerings, and user feedback.
- Created product requirements documents and contributed to sprint planning and backlog grooming sessions.
